Chess app android play against friends

TRACK YOUR MOVES!

Calculate the steps ahead, to avoid mistakes and wrong moves, and make the most of your opponent's game, chess in line allows you to do everything. Through this chess network, you can find your rivals to play with everyone and compete with them. The game includes 8 types of chess boards and 7 different types of chess sets. "Invite your friends to join you in this app" In its general aspects, the application is classic and contains all the unique characteristics for a chess game. A game takes place on a square board, made of 64 small squares, eight squares on each side. If you and your friend feel a little dangerous, you can choose to play this extraordinary version - a simple game called "Code 3". Many different experts and magazines note, that in this application - rediscover chess under the new angle. The does not go with the catch diagonally to a square forward right or forward left, and without capture, to a square forward. You can also communicate with a chat, tag your favorite opponents, etc. The first move is made by the white side. However, you always have the opportunity to play against your friends. It is not always possible to meet friends and spend a few hours playing. The good thing about this is that this tool is capable of the program's actions being very similar to human ones. The address - Pordo is called the address - n to the eighth horizontal for white or the first for black. You can also evaluate your own abilities. The interface itself is quite simple and, except for this ability to change the rules, the application - not have special features. The castle goes any distance in a vertical or horizontal. See how interesting it can be to play when the old pieces have a lot more power or when it has more than a couple Superpentive figures. In case a bit is bored with a game, you can change the topic and appointments of the application.
